

Make Your Patients' Smile Shine

TrioClear™ is an innovative, progressive three-step clear aligner solution to enhance and improve the process of orthodontic treatment and your patient's smile. They are nearly invisible and straighten teeth by using multiple sets of aligners to gradually move teeth to the ideal position.

What makes us different.

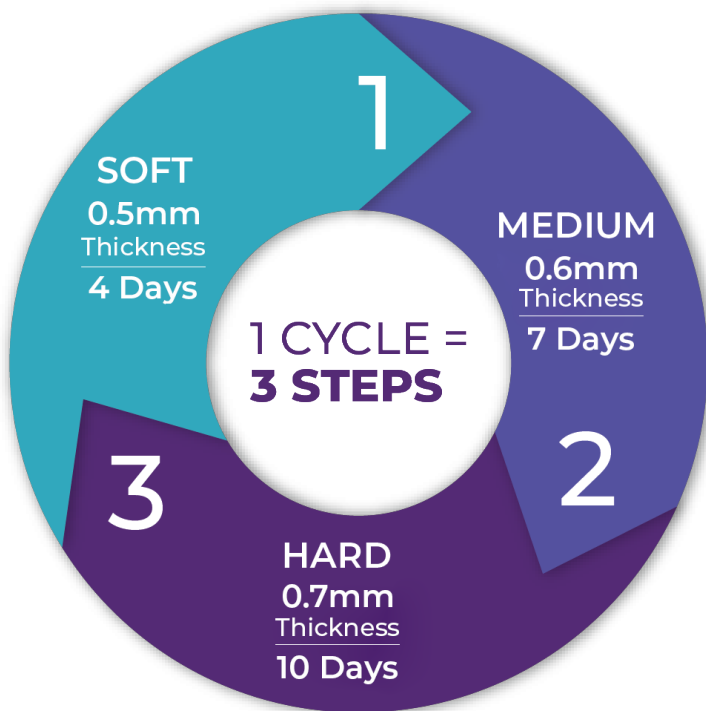

Each cycle is comprised of SOFT to MEDIUM to HARD trays with varying levels of thickness that shift the teeth progressively. Combined with the TrioDim Force™ Technology, TrioClear aligners stay in place with minimal attachments, offering a unique and comfortable solution that improves workflow and saves chair time. Using our clinical simulation software, TrioClear accurately enables you to predict alignment and movement.

KEY BENEFITS

-  Three-step solution
-  Increased Gingival Coverage
-  TrioDim Force Divots
-  Minimal Attachments
-  Comprehensive Clinical Simulation Software
-  Bisphenol-A Free
-  100% Recyclable
-  FDA Cleared

How TrioClear Works

Patients will gradually and continuously improve their teeth alignment and smile during treatment by wearing three clear aligners in diverse thicknesses every cycle. Each cycle is comprised of SOFT to MEDIUM to HARD trays with varying levels of thickness that shift the teeth and help each patient achieve their desired smile.
