

Anterior Denture Teeth (Premium)

SR Vivodent DCL

The new SR Vivodent DCL teeth are made of state-of-the-art DCL material. These high quality teeth are available in A-D and Chromascop shades and in popular Bleach shades, allowing them to be used in a wide range of prosthetic situations.

The natural looking restorations made with SR Vivodent DCL will give your patients good reason to smile. SR Vivodent DCL teeth are composed of a double cross-linked material. Toxicological examinations have confirmed the biocompatibility of this state-of-the-art resin.
