

Professional In-Office Snore Treatment Course

Learn how to implement a new protocol in the fastest growing segment of dentistry

A National Family Opinion poll revealed that 90 million adult Americans snore, but only a small number are treated. The demand is huge and growing, with almost no supply. A new protocol has been developed to meet this demand that is nothing less than revolutionary. Every dentist can efficiently collaborate with sleep specialists and treat in-office for mild sleep apnea and snoring.

For the dentists that add this to their practice, they will be heroes of their community. They will be talked about at every coffee shop and school function. They will be marriage savers. You can be one of the first to bring this service to your community.

Learn on the weekend, treat on Monday

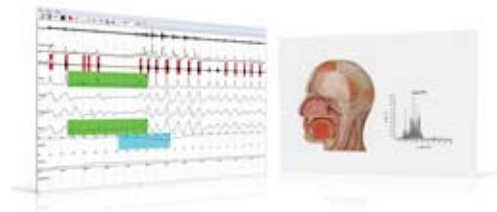

From 1 pm Friday October 1st to noon on Sunday October 3rd, 2010, Dr. Allen Moses, the inventor of The Moses™ appliance, Dr. Richard Bonato, Co-Founder and CEO of BRAEBON Medical and Ms. Gloria Pacini will teach the intensive 20 hour hands-on course. This is a unique opportunity to learn from the top experts in the field.
